

Instruction, film (For students)

Make an inspiring short film with your mobile phone (please use the items/props in the box). Think that the film will encourage others to become interested in the profession!!!

How?

Choose roles: for example, who will film? Who will tell about the profession? Who should find information about the profession? Who should write the text/screenplay?

The film must contain information about:

- a) Tell us what profession it is about
- b) What training you have to attend to become the profession
- c) How easy it might be to get a job in the profession in the future
- d) How the profession might change in the future (ai)

One or more of you can tell/act about the profession in the film, or you can write about the profession on paper. Use your imagination!!

(Remember to be close with the mobile phone or camera if you are going to speak! That way the sound will be good!)
